

## JAGUAR CLASSIC 20W-50 MOTOR OIL

### FOR JAGUAR & DAIMLER MODELS OF THE 1950's, 60's & 70's

Without a doubt, oil is not what it was. Modern engines, designed over the last ten years demand sophisticated oils that are inappropriate for use with the classic car engines of the 1950's, 60's and 70's. On the other hand, some multigrades may not offer the specification and protection needed to ensure long life and reliability for your classic engine.

Jaguar Daimler Classic Parts have therefore introduced to the growing range of genuine parts a superb quality oil suitable for Classic Jaguars and Daimlers - Jaguar Classic 20W-50 Motor Oil. Together with our service kits you now have available everything you need to maintain your classic.

Fully recommended by Jaguar Cars, this classic motor oil is suitable for use in all V12 engined models. The best news is the remarkable value for money of Jaguar Classic 20W-50 Motor Oil, priced to offer you top quality at a very affordable price. Between us we'll keep the heart of your Classic beating strongly for many years to come.

JAGUAR CLASSIC 20W-50 Motor Oil part no. JHM1082

<b>WOODEN VENEER FACIA PANELS</b>									
<p>One of the hallmarks of the Jaguar XJ saloon is the high quality wooden veneer used on the facia and at varying times during production; the door cappings and centre console. Unique among major automotive manufacturers, Jaguar produce the veneered products for their various models in house at Brown's Lane. Many may be surprised to learn that there is also a department within to service the needs of "non-current" models. Jaguar Heritage has worked closely with enthusiastic members of this department to reintroduce veneered products for the XJ saloon range. These products are available today due to their efforts. If you ever have the opportunity to visit the Jaguar factory and take one of the factory tours, the veneer department stop is certainly a very interesting and insightful part of your journey.</p>
