Maintenance

Introduction

The details provided by FENDT in the maintenance plan should help you to care for your forage harvester, so that the machine will perform at maximum efficiency.

As soon as the next service is due, please contact your FENDT dealer, who you can trust to carry out high-quality work. Your dealer can offer you the following, amongst other things:

- Special equipment and devices.
- Trained, competent maintenance specialists, who are familiar with all aspects of your forage harvester.
- Guaranteed FENDT original spare parts.

The maintenance plan prescribed by FENDT is essential in order to ensure your forage harvester has a long and reliable service life. It also ensures efficient operation and the highest level of operational reliability for your forage harvester.

The Service Record Book forms an ongoing record of all the tests carried out. After the work has been completed, check that the Service Record Book has been filled out correctly, stamped and signed by your dealer. A complete Service Record Book showing all the maintenance work carried out serves as a record of the correct maintenance condition of the forage harvester. This is of particular importance when making a claim under warranty or to increase the resale value.

In the case of intensively used forage harvesters, the maintenance intervals must be strictly observed. However, if a forage harvester is used under wear-intensive conditions, the maintenance

intervals must be reduced. More details can be found in the Operator's Manual.

First maintenance interval after 50 operating hours

If your new FENDT forage harvester has already completed 50 operating hours, please arrange for the first service to be carried out. This inspection includes a complete check of the forage harvester with all the maintenance work listed in the maintenance plan. As with all subsequent maintenance inspections, maintenance after 50 operating hours is subject to charge.

Contact your FENDT dealer and arrange a suitable time for this work to be carried out.

We would recommend that you make use of this service and are present when the maintenance work is carried out. This way, you can discuss any problems in operating the forage harvester with the dealer.

Information about customer service and maintenance

Your forage harvester will only perform to your complete satisfaction if you take good care of it from the very start. Your dealer will therefore put your forage harvester into operation, and instruct you on how to operate and maintain it.

The maintenance of the forage harvester in accordance with

750 operating hours
